Re: Rules for Participating in a Public Meeting

The following has been adapted from the "Rules for Participating in a Public Meeting" used by Kenai Peninsula SAB of SPHI.

Each member of the public desiring to speak on any issue before the SPH Operating Board of Directors at tonight's meeting will be given an opportunity to speak to the following guidelines:

- Those who wish to speak will need to sign in on the sign in sheet being circulated. When the chair recognizes you to speak, you need to clearly give your name and the subject you wish to address.
- Please be concise and courteous, in time, so others present will have an opportunity to speak.
- Please observe normal rules of decorum and avoid disparaging by name the reputation or character of any member of the Operating Board of directors, the administration or personnel of SPHI, or the public. You cannot mention or use names of individuals.
- The Operating Board Directors may ask you to respond to their questions following your comments. You could be asked to give further testimony in "Executive Session" if your comments are directly related to a member of personnel, or management of SPHI, or dealing with specific financial matters, either of which could be damaging to the character of an individual or the financial health of SPHI, however, you are under no obligation to answer any question put to you by the Operating Board Directors.
- This is your opportunity to provide your support or opposition to matters that are within the areas of Operating Board of Directors governance. If you have questions, you may direct them to the chair.

These rules for participating in a public meeting were discussed and approved at the Board Governance Committee meeting on February 24, 2013.

11. REPORTS

11.1. Chief Executive Officer

Ryan Smith, CEO, gave a verbal report. SPH had two items on the assembly agenda last night - the Mako smart robotics system and the Epic sole source award. We have issued an RFP for housing solutions. We are still waiting to find out how much money we're getting for the childcare grant. The public hearing for the Certificate of Need was held on October 5th, and the public comment period will end on November 10th.

11.2. BOD Committee: Finance

Walter Partridge, Finance Chair, reported. The committee met last week and reviewed the resolution approved earlier in this meeting, as well as the finances for September. The net operating revenue was right on target, slightly above budget. We're also back to 51 days in accounts receivable.

11.3. BOD Committee: Governance

Aaron Weisser, Governance Chair, reported. The committee met last week. We are continuing to review policies on a three year rotating schedule, and are moving into the Quality policies next. We discussed board membership, and will be setting up candidate interviews for open board seats. Those interviews will be done via Zoom and all board members are welcome to participate. The committee also compiled a master list of reports with the schedule and nature in which they're provided. We will be adding a link to that list on all board meeting agendas starting in 2024. The committee also discussed scheduling the next Doctors' Dinner for the week of February 18th in 2024.

11.4. BOD Committee: Education

Melissa Jacobsen, Education Committee Chair, reported. The Education Committee met this month, though only one other member was able to attend. We are looking at late March/early April for the next board work session/retreat. We touched on strategic planning and talked about professional development for new board members. We discussed iProtean, and decided not move forward on renewing the platform, as it was not well utilized, but will discuss this further when the full committee is in attendance.

He announced that Dr. Paula Godfrey has stepped down as the Peer Review Committee Chair and Trauma Coordinator, so he would be joining the committee in her place. Re: SPH and LTC Facility Corporate Compliance & Ethics Program and Policy

The SPH and LTC Facility Corporate Compliance & Ethics Program is to be reviewed annually per CMS §483.85 (e).

South Peninsula Hospital (SPH) and its Long Term Care Facility (LTC) maintain a Compliance and Ethics Program to ensure quality of care and the prevention and detection of possible violations of SPH and LTC policies and procedures, criminal, civil, and administrative violations under the Social Security Act ("Act"). The Program also provides an appropriate setting for discussion of ethical issues and for protecting human dignity and patient/resident rights.

There were very minor changes required to the Program this year specifically to some of the reference information. Regulatory information remains current. Subject matter experts including LTC Administrator and CFO were able to review and provide input. Any changes made are indicated in red or blue-lines. APPROVED BY: Pensio	EFFECTIVE: 12/3/21	

PURPOSE:

Guidelines for management of employee pension trust.

DEFINITIONS:

N/A

POLICY:

South Peninsula Hospital sponsors a Defined Benefit Plan for the exclusive benefit of the participants. The name of the plan is The South Peninsula Hospital Employee Pension Plan (Plan). The Plan Trustees shall fulfill their fiduciary responsibility solely for the plan participants and their beneficiaries while controlling administrative costs at a reasonable level. Plan contributions and assets must be sufficient to meet the obligations of the plan as they come due.

INVESTMENT POWERS AND DUTIES OF THE TRUSTEES: Section 7.2 of the South PeninsulaHospital Employee Pension Plan authorizes the Plan Trustees to invest the funds of the plan. ThisSection of the plan states,

"The Trustee shall invest and reinvest the Trust Fund to keep the Trust Fund invested without distinction between principal and income and in such securities or property, real or personal, wherever situated, as the Trustee shall deem advisable, including, but not limited to, stocks, commonor preferred, bonds and other evidences of indebtedness or ownership, and real estate or any interesttherein. The Trustee shall at all times in making investments of the Trust Fund consider, among otherfactors, the short and long-term financial needs of the Plan on the basis of information furnished by the Employer."

INVESTMENT POLICY:

- Invest the Plan's assets with the objective to maintain and increase the purchasing power of those assets relative to inflation.
- Purchase assets of a type and in a manner that a normal investment manager of prudence and caution would purchase. This includes limiting the fees associated with "churning" the investments.
- 3. Emphasize continuity of performance over volatility and short-term performance.

INVESTMENT GOALS:

- To attain a rate of return that compares favorably relative to standard market indices over a market cycle
- To generate sufficient asset growth in real terms to meet future benefit obligations. Asset growth within
 the plan should reduce the long-term capital required from the plan sponsor.
- 3.2. Exceed the rate of inflation as measured by the Consumer Price Index by at least 3% per annum.
- 4-3. Improve and stabilize the funded status of the Plan. Accordingly, plan assets may be allocated for the purposes of:
 - 5.• Achieving a long-term rate of return that exceeds the growth rate of liabilities; and
 - 6.• Matching the market value and risk of the Plan's assets with the Plan's liabilities.

INVESTMENT STRATEGY:

Capital preservation and managed risk are an integral part of the hospital's investment strategy. Capital

preservation during periods of declining markets should be emphasized versus maximizing

performance during expanding market periods. High risks should be avoided, while moderate riskshould be assumed in order to achieve the goals of exceeding inflation.

The primary strategy used to reduce risk and enhance returns is diversification. Diversification in equities is most easily and economically achieved through the use of index mutual funds. The Fund'sinvestments are spread between three (3) major asset classes:

- Equities
- Fixed Income
- Cash Equivalents

This diversification not only reduces the possibility of major losses but enables the Plan to share in the gains made in each of the assets' classes.

South Peninsula Hospital will at all times seek to minimize the risk to the Plan by selecting investments and investment strategies that will maintain the plan assets at a level sufficient to cover current and future plan payouts while simultaneously keeping PGBC premiums and monthly cash contributions to the plan at a minimum.

INVESTMENT OBJECTIVES:

A. Fixed Income:

- 1. The fixed account should provide a competitive return with the lowest level of risk. This can be achieved through a fixed account that guarantees a minimum interest rate and pays currents rates.
- 2. All fixed income securities held in the portfolio shall have a Moody's, Standard & Poor's and/or Fitch's credit quality rating of no less than "Baa." The U.S. Treasury and governmentagencies, which are unrated securities, are qualified for inclusion in the portfolio. If a bond falls below Baa or equivalent and the Investment Manager in consultation with the Trustees demonstrates the Plan will benefit by holding the bond to maturity rather than selling at a loss, then the bond may be retained.
- 3. The exposure of the portfolio to any one issuer, other than securities of the U.S. government or agencies, shall not exceed 10% of the market value of the fixed incomeportfolio.
- 4. Holdings of individual issues shall be large enough (round lots) for easy liquidation.
- 5-2. The Plan shall be allowed to hold fixed-income mutual funds with an average bond qualityof A or better.

B. Cash/Cash Equivalents:

- Cash equivalent reserves shall consist of cash instruments having a quality rating of A-1, P-1 or higher. Eurodollar certificates of deposit, time deposits, and repurchase agreements are also acceptable investment vehicles.
- 2. Any idle cash not invested by the investment managers shall be invested daily through anautomatic interest-bearing sweep vehicle managed by the custodian.

C. Long Term Objectives - Five Years and Beyond - Equities:

Index mutual funds shall normally be used to achieve adequate diversification and minimize management costs. If investments are made in equities other than through mutual funds, suchequity investments will be reasonably diversified in the most efficient manner in order to:

1. U.S. Equities:

- Equity holdings in any one company should not exceed more than 5% unless the specific stock is
 equal to more than 5% of its benchmark index of the market value of the Plan's equity portfolio.
- No more than 25% of the market value of the portfolio shall be invested in any oneeconomic sector.

2. International Equities:

- Equity holdings in any one company shall not exceed more than 5% unless the specific stock is
 equal to more than 5% of its benchmark index of the international equity portfolio.
- No more than 25% of the portfolio shall be invested in one industry category.
- Allocations to any specific country shall not be excessive relative to a broadly diversified international equity manager peer group. It is expected that the non-U.S.equity portfolio will have

Commented [SS3]: These provisions are intended for the use of individual bond securities and do not apply to the way Newport approaches defined benefit plans. We feel that mutual funds offer the advantage of lower costs and better diversification due to the benefit of scale. While I don't see any negative consequence to keeping this language, if the plan does wish to use a manager that invests in individual fixed income securities, it may be beneficial to coordinate the IPS with the manager's approach.

no more than 40% in any one country.

INVESTMENT GUIDELINES:

1. <u>Allowable Investments</u>

All or any part of the pension assets may be placed in investment vehicles that are not listed under prohibited transactions. All companies offering investments should have nationally recognized ratings such as Standard & Poor's, A.S. Best, Morningstar, and Duff& Phelps etc.

2. <u>Prohibited Transactions</u>

There shall be no investments or transactions specifically prohibited by the Employee Retirement Income Security Retirement Act of 1974 or amendments thereto. In addition, investment activity in the following is prohibited without prior written permission of the Board of Directors of the South Peninsula Hospital, Inc.:

- Stock Options, Futures, or Commodities
- · Coin or Gold Futures
- Volatile Derivative Investments
- Stock Loans
- Margin Purchase or Borrowing Money
- Direct Ownership of Letter Stock

Commented [SS4]: You should consider removing the US, or allowing for the use of international bonds. While most bond funds we recommend for your plan currently will be nearly 100% US, we don't want to violate the IPS if any funds have small allocations to international holdings.

Commented [SS5]: Consider removing this since we use mutual funds. Many mutual funds will have a small allocation to below-investment grade bonds. Additionally, if you want to invest in individual bonds, the criteria will be outlined earlier in the IPS.

Commented [SS6]: The table in the current IPS has a very narrow range of allowable allocations and has specific ranges for styles such as value and growth. I narrowed down the "Large Cap" styles to a single category to allow more flexibility over the long term. For the target, I used our current recommendation for the plan, but allowed a wide range to accept the current 50/50 allocation and some market drift. For the fixed income minimum range, I want to be sure there is ample flexibility to set a fixed income allocation that is driven by the plan's liabilities, rather than an arbitrary limit by each class cales.

Each year the Plan's trustees will meet to discuss the asset allocation to determine how much of the fund to invest in fixed income, U.S., and international equities. The following factors will be taken intoconsideration:

- The long term average rate of return being sought
- The amount of risk to which the portfolio should be exposed
- · The probability of preserving principal
- The probability of earning enough to offset inflation; and
- The probability of earning, in upcoming years, the target rate of return.
